MISSION

FRHS combines research with a strong field presence and strives to make research results relevant to diverse audiences, from field level health workers to program managers and policy-makers.

FINDING WAYS FOR A HEALTHIER NATION.

A Not-for-Profit Research Organization

FRHS predominantly works in the areas of maternal health, adolescent health, child health and nutrition, reproductive health, family planning and prevention of HIV/AIDS.

6) Strengthening the monitoring and review mechanism and building M&E capacity of the National Vector Borne Disease Control Program through secondment of M&E Officers. (Funding Agency: BMGF) **Year: 2019**

HEALTH MONITOR

With an interest of presenting health information, especially on “Health for All” indicators, FRHS collates data from various sources on these indicators and is published as “Health Monitor” every year.

Governing Council Members

The FRHS Team consists of professional and dedicated personalities from the fields of Health Services, Education and Public Administration with proven track records in their respective areas of operation.
